BANGOR DAILY WHIG AND COURIER.

BY WHEELER & LYNDE. THURSDAY MORNING, DECEMBER 10, 1857. VOLUME XX.....NUMBER 138.

Dr. McLANE'S
CELEBRATED
VERMIFUGE
AND
LIVER PILLS.
Are the best Preparations of the kind.

They are not recommended as Universal Pill-alls, but simply for what their name purports.

The VERMIFUGE, for expelling Worms from the human system, has been administered with the most satisfactory results to various animals subject to Worms.

The LIVER PILLS, for the cure of LIVER COMPLAINT, all BILIOUS DERANGEMENTS, SICK HEADACHE, &c.

Purchasers will please be particular to ask for Dr. C. McLane's Celebrated VERMIFUGE and LIVER PILLS, prepared by

Fleming Bro

THE PROPRIETORS, Pittsburgh, Pa., and take no other, as there are various other preparations now before the public, purporting to be Vermifuge and Liver Pills. All others, in comparison with Dr. McLANE'S, are worthless.

The GENUINE McLANE'S Vermifuge and Liver Pills can now be had at respectable Drug stores.

FLEMING BRO'S,
60 Wood St., PITTSBURGH, PA.
Sole Proprietors.

I. HAY & CO. Portland, General Agents for Maine. Sold in Bangor by A. P. Gould and Jackson. dawôm June12

American & Foreign Patents.

H. EDDY,
Solicitor of Patents,
Agent of U.S. Patent Office, Washington, under Act of 1837.
State Street, opposite Kilby-st.,
BOSTON.

HAVING extensive practice of upwards of twenty years, continues to secure Patents in the United States, also in Great Britain, France, and other foreign countries. Caveats, Specifications, Assignments, and all Papers or Drawings for Patents executed on liberal terms, and with care. Research made into American or Foreign works, to determine the validity or novelty of any inventions—and legal opinions rendered in all matters touching the same, or of the claims of any Patent furnished by enclosing One Dollar. Assignments recorded in Washington. Models, Drawings, &c., forwarded.

This Agency is not only the largest in New England, but through it inventors have advantage of selecting Patents, or ascertaining the probability of inventions, unsurpassed by, if not equal to any agency, by any which can be shown elsewhere. The testimonials below prove that none is MORE SUCCESSFUL. THE PATENT OFFICE than the subscriber, as SUCCESS IS THE BEST PROOF OF ANTAGONISTIC ABILITY. He would add he has abundant reason to believe, and does believe, that at no other office of the kind, are urgent professional services so moderate, or the immense practice of the subscriber, during 20 years past, has enabled him to maintain a vast collection of specifications and official documents relative to patents. These, besides his own private library of legal and mechanical works, and all records of Patents granted in the United States and Europe, render him available, very cheap, to offer superior facilities for obtaining the necessity of a journey to Washington, to secure a patent, and the usual great delay there, to the saved inventors.

TESTIMONIALS.

Having the time I occupied the office of Messrs. Edson & H. Eddy, Esq., of Boston, the business of the Patent Office, as Solicitor for procuring Patents, I feel a pleasure in stating that I have found the latter gentleman to be well versed in the business before the Patent Office, and more than this, I consider him a skillful and honorable Patent Solicitor in the profession. I regard Mr. Eddy as one of the most skillful and honorable Patent Solicitors in the country, and have no hesitation in assuring inventors that they cannot employ a person more competent, and more assiduous capable of putting their applications in the best form to secure them as early and favorably as any other Patent Office.

EDMUND BURKE,
Late Commissioner of Patents.

(Extract from our Commissioner's Report for 1845.)—During the year, Mr. H. Eddy, Solicitor, has been extensively engaged in the prosecution of claims in this office, and has shown himself well versed in the law, and the rules of practice in this office, and has shown himself to be a person of the most upright and honorable character, with whom I have had official intercourse.

CHARLES MAGRUDER,
Late Commissioner of Patents.

WILLIAM H. WHEELER,
JOHN H. LYNDE.
Bangor, December, 1857.

To Mechanics, Inventors, and Manufacturers.

IN announcing the THIRTEENTH Annual Volume of the SCIENTIFIC AMERICAN, the Publishers respectfully inform the public that in order to increase and stimulate the formation of clubs, they propose to offer

One Thousand Five Hundred Dollars in Cash Premiums,

for the fifteen largest lists of subscribers sent in by the 1st of January, 1858, said premiums to be distributed as follows:—

For the largest list $200, 2d, $250; 3d, $200; 4th, $150; 5th, $100; 6th, $90; 7th, $80; 8th, $70; 9th, $60; 10th, $50; 11th, $40; 12th, $35; 13th, $30; 14th, $25; 15th, $20.

Names of subscribers can be sent in at different times and from different post offices. The cash will be paid to the orders of the successful competitors immediately after the 1st of Jan., 1858.

Southern, Western, and Canadian money will be taken for subscriptions. Canadian subscribers will please to remit twenty-six cents extra on each year's subscription to prepay postage.

Terms of Subscription—Two Dollars a year, or One Dollar for Six Months.

Club Rates.—Five Copies for Six Months, $4; Five Copies for Twelve Months, $7; Ten Copies for Six Months, $8; Ten Copies for Twelve Months, $14; Twenty Copies for Twelve Months $25.

For all Clubs of Twenty and over, the yearly subscription is only $1 a piece.

The new volume will be printed upon fine paper, with new type.

The general character of the SCIENTIFIC AMERICAN is well known, and, as heretofore, it will be chiefly devoted to the promulgation of information relating to the various Mechanical and Chemical Arts, Manufactures, Agriculture, Patents, Inventions, Engineering, Mill Work, and all interests which the light of Practical Science is gallantly forward to advance. It is issued weekly, in form for binding, it contains annually two hundred and fifty finely executed Engravings, and notices of American and European improvements, together, with an Official List of American Patent Claims published weekly, in advance of all other papers.

It is the aim of the Editors of the SCIENTIFIC AMERICAN to present all subjects discussed in its columns in a practical and popular form. They will also endeavor to maintain a candid, fearless tone, in combatting, and exposing false theories and practices in Scientific and Mechanical matters, and thus preserve the character of the SCIENTIFIC AMERICAN as a reliable Encyclopedia of Useful and Entertaining Knowledge.

Specimen copies will be sent gratis to any part of the country. Address MUNN & CO., Publishers and Patent Agents, No. 128 Fulton-st., New York.

MPORTANT DISCOVERY!
CONSUMPTION CURABLE!
BY THE VIRTUES OF
FOUSSE'S SPARULUM VITÆ!
The most powerful and effectual remedy ever discovered for the treatment of PULMONARY CONSUMPTION!

This medicine is a choice combination of Vegetable products, and possesses all the rare medicinal properties so long and eagerly sought for by the profession. It is the result of diligent study and research through a long series of years, and is now, for the first time, presented to the notice of the public.

To every case of suspected PULMONARY CONSUMPTION, where it has been tried it has proved, beyond any doubt, to be a specific remedy. It is a very agreeable and pleasant medicine, and a trial of its virtues is earnestly recommended to every person who has a cough, or who may be predisposed to Consumption, as a remedy of no ordinary value, with the assurance that, if the directions which accompany it are faithfully adhered to, it will prove to be a novelty in Medicine, restoring the healthy functions to all the organs of the body.

Directions in English, French, and German, accompany each package. Price $1 per bottle.

All orders by mail, or express, accompanied by the money, will be promptly attended to.

F. J. LAFORM, Sole Agent,
No. 36 Tremont Street,
(Opposite the Old South Church,)
Boston, Mass.

N. B.—A Treatise upon the Nature, Causes, Symptoms, and Prevention of Pulmonary Consumption can be had on application at the Office of the Agent, as above, or will be sent by mail to any address. This Treatise will well repay a perusal. nov26'57. dlp

NEW AND IMPORTANT DISCOVERY IN THE SCIENCE OF MEDICINE.

TRIESMAR.—None are genuine unless the engravings of the Seals of the Patent Office of England, the Seals of the Royal Pharmacie in Paris, and the Imperial College of Vienna, are placed upon each wrapper, and sound each case.

Sold by Dr. H. A. BARROW—Member of the Imperial College of Vienna, and Royal College of Surgeons, London, who may be personally consulted at his residence, No. 167 Prince-Street, (few blocks West of Broadway) New York, from 11 o'clock in the morning till 2, and from 6 o'clock till 8 in the evening, (Sundays excepted.)

TRIESMAR No. 1—It No. 1 is the remedy of general and local debility, loss of vital power, premature decay, and all the distressing consequences arising from early abuse, leading all physical impediments vanish like magic before its influence, thus rendering its use invaluable to those entering the marriage state.

TRIESMAR No. 2—Entirely eradicates all traces of those disorders which copaiba and cubebs have so long been thought an antidote for to the ruin of the health of a vast portion of the population.

TRIESMAR No 3—Is the great European remedy for that class of disorders which, unfortunately, the English physician treats with mercury to the inevitable destruction of the patient's constitution, and which all the Sarsaparillas in the world cannot remove.

TRIESMAR No. 1, 2 and 3—Are prepared in the form of a lozenge, devoid of nauseous smell, and can be carried in the waistcoat pocket. Sold in one box and divided in separate doses, or administered by Valpeau's Lallemant, Roux, Blondet, &c. Price $3 each, or four cases in one for $9, which saves $3; and in 27 cases, whereby there is a saving of $9.

Special agents, agents have been made with the various Express companies, who will, for a small fee, the Triesmar, and the larger sizes, will be furnished by Dr. Barrow, carriage paid, immediately on receiving a remittance, to any place of the world, securely packed, and addressed according to the directions of the writer, thus securing to the public genuine European preparations, and effectually protecting them from spurious and pernicious imitations. The three dollar cases are as usual, but not free of carriage.

No. 167 Prince-st., (a few blocks west of Broadway) New York.—Jan. 15'57.

OCTOBER, rec'd by
D. BUGBEE & CO.

American Safety Paper
Manufacturing Company of N. Y.
Capital $500,000.
A. NICHOLAS, President. Office, 70 Wall-st.

A Perfect Security against all manner of Fraud or Counterfeiting on Paper—To Prevent Photographic and Analytic Counterfeits, Erasures, Transfer or Alterations.

HAVING purchased the Patent for the exclusive right to manufacture and sell the Chemical Paper in America, invented and patented in England by HENRY GLYNN, a celebrated chemist and officer in the British army. It is hardly necessary to say U. of the Paper is recommended by Mr. Kent, Assayer of the U. S. Mint, Mr. Lyman of the New York Clearing House, and Meade Brothers, distinctive and skillful photographers, 225 Broadway, N. Y. The latter say that no solution can be made on a check or bank note printed on the Safety Paper. Below is our list of prices:—

Bank Checks—25 cts. per lb.
Bank Bills—$18 for 1000 sheets.
Bills of Exchange—$25 for 1000 sheets.
Promissory Notes—30 cts. per lb.
Sight and Time Drafts—$25 for 1000 sheets.
Insurance Policies—40 cts. per lb.
Railroad Stocks and Bonds—40 cts. per lb.
Bank and State Stocks—40 cts. per lb.
Bonds and Mortgages—40 cts. per lb.
Wills and Deeds—40 cts. per lb.

For wrapping Silks and other fine articles it is excellent, as it prevents moths. 40 cts. a lb.

For Indentures and Agreements, 40 cts a lb.

Affidavits and County Records should always be printed or written on this paper, as the chemicals inserted in the pulp not only prevents erasure or transfer, but makes it lasting as time.

For Southern climates it is excellent, and much superior to any other, as the moistness of the climate does not destroy it—the properties inserted in the pulp being a preventive. In all the Southern States, Cuba, the Westindies, and the Central American States, no public records can be kept over 20 years, written on the ordinary paper, while the oils or other chemicals inserted in this paper makes it indestructible by the ravages of time. It is also proof against moths, rats and other vermin, which insect on and destroy all other paper now in use.

The Company have now in operation Mills in Morris County, N. J., of about 300 horse power, and are able to fill all orders for Paper at the shortest notice.

All orders for the Paper must be addressed to A. NICHOLAS, President of the Company, No. 70 Wall street, New York.

M. W. KING & SON,
Chair Manufacturers
438 BROOME-ST., One Door East of Broadway, (Late 468 Broadway) New York.
(Established A. D. 1832.)

INVITE an examination of their great variety and superior assortment of CHAIRS, manufactured at their own establishment, and under their immediate observation and direction, including

Fluted Revolving Chairs, Self-acting Extension Dining Chairs, Library Chairs, Invalid Wheel Chairs, Nursing Rocking Chairs, Common Chairs, Spanish Seats, Cane Seat Chairs, Rocking Chairs, Spanish and Antiquity Rush Seats, &c., &c.

Embracing the most varied assortment, and choicest kinds for Parlors, Dining Rooms, Chambers, Gardens, Libraries, Counting Houses, Offices, Public Institutions, Hotels, Barbers, &c., whether with every description of chair adapted to the comfort, convenience, and luxury of the Sick, the Aged, the Infirm, or the Invalid Lady.

In point of ingenuity, elegance of finish, quality and richness of materials, facility of execution, durability, and cheapness, these Chairs are unsurpassed. For these M. W. King & Son were awarded the first and only Prize Medal, and the Faculty recommend them as more preferable to beds or couches for patients afflicted with Spinal, Anchylosis, or Rheumatic affections.

To either item of the chair may be attached a convenient reading or writing desk, and any convenient desired will be manufactured to order.

A Circular with explanatory cuts, will be sent by mail if requested, and orders, (with remittances,) promptly forwarded to any part of the world.

LUXURY AND ECONOMY.

King's New Chair Cheaper than Wood.

An Arm Chair, Rocking Chair, Couch and Lounge, (combined in one) is susceptible of 12 different positions or changes, to meet the varied requirements for comfort, convenience, luxury, (or space as well as price.) Whether in sickness or health, this celebrate CHAIR, "for you, Kate," excels in many respects any chair perhaps ever manufactured in this or any other country.

The price varies from Fifteen, to Thirty Dollars, according to size and finish.

To Public Institutions, as well as to individuals, this Chair is a very desirable article, and will be supplied in any number on the most liberal terms. Apply to, or address,

M. W. KING & SON,
438 Broome street, one door East of Broadway, (late 468 Broadway.)

LINCOLN'S
WATER PROOF BLACKING
AND LEATHER PRESERVATIVE.

Keep your Feet dry, and you will seldom need a Doctor to cut Bunions.

It is not a truth that wears the feet are often wet. It is one of the greatest causes of colds and consumption! It is a truth that when leather is often wet and dried, it soon becomes hard, stiff, and cracks; but when it is waterproof, this is remedied. The application of this preservative, it remains soft, and entirely impervious to water.

After being engaged for 25 years in the manufacture of Leather in all its branches, and being often troubled with wet feet myself, I was led to experimenting on different compositions, and found it easy to make it water-proof, but at the same time extremely injurious to the leather. At last by a chemical process I discovered a preparation which not only hardened the leather, but gave it properties, with which leather is tanned. It will not only make the leather water-proof, but it likewise softens the leathers, and it will

Positively wear twice as long.

I have now used it for three years, and the large part of that time have worked in a wet Tannery, with my boots constantly in water, and have not had my feet wet during that time. I can therefore in all confidence, recommend it to the public as the best article in the market.

We received the President's Message last evening by the mail train, and present it to our readers this morning, to the exclusion of much other matter. We have no room for comments upon the document to day

PRESIDENT BUCHANAN'S First Annual MESSAGE.

Fellow Citizens of the Senate and House of Representatives:

In obedience to the command of the Constitution, it has now become my duty to give to Congress information of the state of the Union, and recommend to their consideration such measures as I judge to be necessary and expedient.

But first and above all, our thanks are due to Almighty God for the numerous benefits which He has bestowed upon this people, and our united prayers ought to ascend to Him that He would continue to bless our great and public in time to come as He has blessed it in time past.

FINANCIAL TROUBLES AND THE BANKING QUESTION.

Since the adjournment of the last Congress our constituents have enjoyed a unusual degree of health. The earth has yielded her fruits abundantly, and has bounteously rewarded the toil of the husbandman. Our great staples have commanded high prices, and, up till within a brief period, our manufacturing, mineral and mechanical interests have largely participated in the general prosperity. We have possessed all the elements of material wealth in rich abundance, and yet, notwithstanding all these advantages, our country, in its monetary affairs is at the present moment in a deplorable condition. In the midst of unsurpassed plenty in all the productions of agriculture and in all the elements of material wealth, we find our manufactories stopped, our public works retarded, our private enterprises of different kinds abandoned, and thousands of useful laborers thrown out of employment and reduced to want. The revenue of the government, which is chiefly derived from duties on imports from abroad, has been greatly reduced, while the appropriations made by Congress at its last session for the current fiscal year are very large in amount. And these circumstances a loan may be required before the close of your present session, but this although deeply to be regretted would prove to be only a slight misfortune when compared with the suffering and the distress prevailing among the people. With this the government can not fail deeply to sympathize, though it may be without the power to extend relief.

It is useless to inquire what has produced such unfortunate results and whether its recurrence can be prevented. In all former seasons the blame might have been fairly attributed to a variety of operating causes, but not so in the present occasion. It is apparent that our existing misfortunes have proceeded solely from our extravagant and vicious system of paper currency and bank credit, exciting the people to wild speculation and gambling in stocks. These revulsions must continue to occur at successive intervals, so long as the amount of paper currency of bank loans and discounts of the country shall be left to the discretion of fourteen hundred irresponsible banking institutions, which from the very law of their nature will consult the interest of their stockholders, rather than the public welfare.

The framers of the constitution when they gave to Congress the power to coin money and to regulate the value thereof, and prohibited the states from coining money, emitting bills of credit, or making anything but gold and silver coin a tender in payment of debts supposed they had provided the people against the evils of an excessive and irredeemable paper currency. They are not responsible for the existing anomaly that a government endowed with the sovereign attribute of coining money and regulating the value thereof should have no power to prevent others from driving this from out of the country and filling up the channels of circulation with paper which does not represent gold and silver.

It is one of the highest and most responsible duties of government to insure to the people a sound circulating medium, the amount of which ought to be adapted with the utmost possible wisdom and skill to the wants of internal trade and foreign exchanges. If this be either greatly above or greatly below the proper standard, then the market value of every man's property is increased or diminished in the same proportion, and injustice to individuals as well as incalculable evils to the community are the consequence.

Unfortunately under the construction of the federal compact it is not within the power of Congress to regulate the value of the currency of the different states, and prohibit the exercise of this important and delicate duty has been discovered from the coining power and virtually transferred to more than fourteen hundred State banks, acting independently of each other, and regulating their paper issues almost exclusively by a regard to the present interest of their stockholders. Exercising the sovereign power of providing a paper currency, instead of coin for the country, the first duty which these banks owe to the public is to keep in their vaults a sufficient amount of gold and silver to insure the convertibility of their notes into coin at all times and under all circumstances. No bank ought ever to be chartered without such restrictions on its business as to secure this result. All other restrictions are comparatively vain. This is the only true touchstone, the only efficient regulator of a paper currency—the only one which can guard the public against over issues and bank suspensions. As a collateral and eventual security it is doubtless wise and just that banks should hold an amount of United States or State securities equal to their notes in circulation and pledged for their redemption. This however furnishes no adequate security against over issues. On the contrary, it may be perverted to inflate the currency. Indeed, it is possible by this means to convert all the debts of the United States and State governments into bank notes, without reference to the specie required to redeem them. However valuable these securities may be in themselves, they cannot be converted into gold and silver at the moment of pressure, as our experience teaches, in sufficient time to prevent bank suspension and the depreciation of bank notes. In England, which is to a considerable extent a paper money country, though vastly behind our own in this respect, it was deemed advisable, anterior to the last of Parliament in 1844, which wisely separated the issue of notes by the banking department, for the Bank of England always to keep on hand gold and silver equal to one third of its combined circulation and deposits. If this proportion was no more than sufficient to secure the convertibility of its notes with the whole of Great Britain, and to some extent the continent of Europe, as a field for its circulation, rendering it almost impossible that a sudden and immediate run to a dangerous amount should be made upon it, the same proportion would certainly be insufficient under our banking system.

Each of our fourteen hundred banks has but a limited circumference for its circulation, and in the course of a very few days the depositors and noteholders might demand from such a bank a sufficient amount of specie to compel it to suspend, even although it had coin in its vaults equal to one third of its immediate liabilities. And yet I am not aware that with the exception of the banks of Louisiana, that any State bank throughout the Union has been required by its charter to keep this or any other proportion of gold and silver compared with the amount of its combined circulation and deposits. What has been the consequence? In a recent report made by the Treasury Department on the condition of the banks throughout the different States, according to returns dated previous to January, 1857, the aggregate amount of actual specie in their vaults is $68,949,808, of their circulation $214,779,822 and of their deposits $230,351,352. Thus it appears that these banks in the aggregate have considerably less than one dollar in seven of gold and silver, compared with their circulation and deposits.

It was palpable, therefore, that the very first pressure must drive them to suspension, and deprive the people of a convertible currency in a time of distress and serious consequences. It is truly wonderful that they should have so long continued to preserve their credit, which a demand for the payment of one seventh of their immediate liabilities would have driven them in to insolvency. And this is the condition of the banks, upon the strength of four hundred millions of gold from California, have flowed in upon us within the last eight years, and the flow still continues to flow. Indeed, scarcely has been the extravagance of bank credits, that the banks now hold a considerably less amount of specie, either in proportion to their capital or to their circulation and deposits combined, than they did before the discovery of gold in California. While in the year 1848 their specie in proportion to their capital was more than equal to one dollar for four and one half, in 1857 it dwindled to one dollar for every six dollars and thirty-three cents of their capital. In the year 1848 the specie was equal within a very small fraction to one dollar in five of their circulation and deposits, in 1857 it is not equal to one dollar in seven and a half of their circulation and deposits.

From this statement it is easy to account for our financial history for the last fifty years. It has been a history of extravagant expansions in the business of the country, followed by ruinous contractions. The successive intervals of the best and most enterprising men have been tempted to their ruin by excessive bank loans of mere credit, enticing them to extravagant importations of foreign goods, wild speculations, and ruinous and demoralizing stock gambling. When the crisis arrives and arrives it must, the banks can extend no relief to the people in a vain struggle to redeem the liabilities to specie they are compelled to contract their loans and their issues, and at last, in the hour of distress, when their assistance is most needed, they need their debtors to the extent into insolvency.

It is this paper system of extravagant expansions, raising the value of paper property to a fictitious value when compared with the cost of similar articles in countries where circulation is wisely regulated, which has prevented us from coming to our own markets with foreign manufactures, has produced extravagant importations, and has consequently caused a great loss of the large revenue derived from the protection afforded to our domestic manufactures by the present revenue tariff. But for this this branches of our manufactures composed of raw materials, the produce of our own country—such as cotton, wool and woollen fabrics—would not only have acquired almost exclusive possession of the home market but would have created a demand for the surplus in foreign markets throughout the world.

Deplorable however, as may be our present financial condition, we may yet indulge in bright hopes of the future. No one nation has ever existed that could have endured such violent expansions and contractions of paper credit without lasting injury, yet the buoyancy of youth, the energies of our population, and the spirit which never quails before difficulties will enable us soon to recover from our present ruin and embarrassment and may even occasion us speedily to forget the lesson they have taught.

In the meantime it is the duty of the government, by all proper means within its power to aid in alleviating the sufferings of the people occasioned by the suspensions of the banks and to provide against the recurrence of the same calamity. Unfortunately, in either aspect of the case, it is far beyond the reach of the Independent Treasury the government has not been provided by law and, it was compelled to do by the failures of the banks in 1837. It will continue to discharge its habitual duties to the people in gold and silver. Its disbursements then will pass into circulation, and materially assist in restoring a sound currency. From its high credit, should we be compelled to make a temporary loan, it can be effected on advantageous terms. This however should, if possible be avoided, but if not, then the amount shall be limited to the low exchequer bills scheme.

I have, therefore, determined that whilst no useful government works already in progress shall be suspended or new work not already commenced, will be postponed, if this can be done without injury to the country. Those necessary for its defence shall proceed as though there had been no crisis in our monetary affairs.

But the federal government cannot do much to provide against a recurrence of existing evils. Even if unimportant constitutional objections did not exist against the creation of a national bank, this would furnish no adequate preventive security. The last Bank of the United States abundantly proves the truth of this assertion. Such a bank could not, if it would, regulate the issues and credits of fourteen hundred State banks, in such a manner as to prevent the ruinous expansions and contractions in our currency which afflicted the country throughout the existence of the late bank, or secure us against future suspensions. In 1825 an effort was made by the Bank of England to curtail the issues of the country banks under the most favorable circumstances.

The paper currency had been expanded to a ruinous extent, and the bank put forth all its power to contract it in order to reduce prices and restore the equilibrium of the foreign exchanges. I accordingly commenced a system of curtailment of its loans and issues, in the vain hope that the joint stock and private banks of the kingdom would be compelled to follow its example. It found, however, that as it contracted they expanded, and at the end of the process, in employ, the language of a very high official authority, "whatever reduction of the paper currency was effected by the Bank of England, (in 1825) was more than made up by the issues of the country banks."

But a Bank of the United States would not, if it could, restrain the issues and loans of the State banks, because it is duty as a regulator of the currency must often be in direct conflict with the immediate interest of its stockholders. If we expect one agent to restrain or control another, their interests must, at least in some degree, be antagonistic. But the directors of a Bank of the United States would feel the same interest and the same inclination with the directors of the State banks to expand the currency, to accommodate their favorites and friends with loans and to declare large dividends. Such has been our experience in regard to the last bank.

After all, we must mainly rely upon the patriotism and wisdom of the States for the prevention and redress of the evil. If they will afford us a real specie basis for our paper circulation, by increasing the denomination of bank notes, first to twenty, and afterwards to fifty dollars, if they will require that the banks shall at all times keep on hand at least one dollar of gold and silver for every three dollars of their circulation and deposits, and if they will provide by a self executing enactment, which nothing can arrest, that the moment they suspend they shall go into liquidation, I believe that such provisions, with a weekly publication by each bank, of a statement of its condition, would go far to secure us against future suspensions of specie payments.

Congress, in my opinion, possess the power to pass a uniform bankrupt law applicable to all banking institutions throughout the United States, and I strongly recommend its exercise. This would make it the irreversible organic law of each bank existence, that a suspension of specie payments shall produce its civil death. The instinct of self-preservation would then compel it to perform its duties in such a manner as to escape the penalty and preserve its life.

The existence of banks and the circulation of bank paper are so identified with the habits of our people, that they cannot be suddenly abolished without such immediate injury to the country. If we could confine them to their appropriate sphere, and prevent them from administering to the spirit of wild and reckless speculation by extravagant loans and issues, they might be continued with advantage to the public.

But this I say, if or long and much reflection of experience shall prove it impossible to enjoy the facilities which well regulated banks afford without at the same time suffering the calamities which the excesses of the banks have hitherto inflicted upon the country, it would then be for the lesser evil to deprive them altogether of the power to issue a paper currency, and confine them to the functions of banks of deposit and discount.

OUR FOREIGN RELATIONS—THE OSTENDE MANIFESTO QUESTION.

Our relations with foreign governments are, upon the whole, in a satisfactory condition. The diplomatic difficulties which existed between the government of the United States and that of Great Britain at the adjournment of the last Congress have been happily terminated by the appointment of a British Minister to this country, who has been cordially received.

Whilst it is greatly to the interest, as I am convinced it is the sincere desire, of the government and people of the two countries to be on terms of intimate friendship with each other, it has been our misfortune almost always to have had some irritating, if not dangerous, outstanding question with Great Britain.

Since the origin of the government we have been employed in negotiating treaties with that Power, afterwards in discussing their true intent and meaning. In this respect the convention of April 19, 1850, commonly called the Clayton and Bulwer treaty, has been the most unfortunate of all, because the two governments place directly opposite and contradictory constructions upon its first and most important article.

Whilst in the United States, we believed that this treaty would place both Powers upon an exact equality, by the stipulation that neither will ever occupy, or fortify, or colonize, or assume or exercise any dominion over, any part of Central America, it is contended by the British government that this construction of the language has left them in the rightful possession of all that portion of Central America which was in their occupancy at the date of the treaty, in fact that the treaty is a mutual recognition on the part of the United States of the right of Great Britain either as owner or protector, to the whole extensive coast of Central America, sweeping round from the Rio Hondo to the port and harbor of San Juan de Nicaragua together with the adjacent Bay Islands except a comparatively small portion of this between the Sarstoon and Cape Honduras. According to their construction, the treaty does no more than simply prohibit them from extending their possessions in Central America beyond the present limits. It is not too much to assert, that if in the United States the treaty had been considered susceptible of such a construction, it would have been negotiated under the authority of the President, nor would it have received the approbation of the Senate.

The universal convention in the United States was that which our government consented to violate its traditional and time honored policy, and stipulate with a foreign government never to occupy or acquire territory in the Central American portion of our own continent. The considération for this sacrifice was, that Great Britain should, in this respect at least be placed in the same position with ourselves. Whilst we have no right to doubt the sincerity of the British Government in their construction of the treaty, it is at the same time my deliberate judgment that this construction is in opposition both to its letter and its spirit.

Under the late administration, negotiations were instituted between the two governments for the purpose if possible, of removing these difficulties, and a treaty having this laudable object in view, was signed at London on the 17th October, 1856, and was submitted by the President of the Senate on the following 16th of December. Whether this treaty, either in its original or amended form, would have accomplished the object intended without giving birth to new and embarrassing complications between the two governments, may perhaps be well questionable by the different amendments made to it by the Senate.

The treaty, as amended, was ratified by me on the 17th March, 1857, and was transmitted to London for ratification by the British government. That government expressed its willingness to concur in all the amendments made by the Senate with the single exception of the clause relating to Ruatan and the other islands, in the Bay of Honduras. The article in the original treaty, as submitted to the Senate, after reciting that these islands and their inhabitants "having been by a convention bearing date the 27th day of August, 1856, between her Britannic Majesty and the republic of Honduras, constituted and declared a free territory under the sovereignty of the said republic of Honduras," stipulated that "the two contracting parties do hereby mutually engage to recognise and respect in all future time the independence and rights of the said territory as a part of the republic of Honduras."

Upon an examination of this convention between Great Britain and Honduras of the 27th August, 1856, it was found that, whilst declaring the Bay Islands to be "a free territory under the sovereignty of the republic of Honduras," it deprived that republic of rights without which its sovereignty over them could scarcely be said to exist. It divided them from the remainder of Honduras, and gave to their inhabitants a separate government of their own, with legislative, executive and judicial officers, elected by them selves. It deprived the government of Honduras of the taxing power in every form, and exempted the people of the islands from the performance of military duty, except for their own exclusive defence. It also prohibited that republic from erecting fortifications upon them for their protection—thus leaving them open to invasion from any quarter, and, finally, it provided "that slavery shall not at any time hereafter be permitted to exist therein."

Had Honduras ratified this Convention, she would have ratified the establishment of a State substantially independent within her own limits, and a State at all times subject to British influence and control. Moreover, had the United States ratified the treaty with Great Britain in its original form, we should have been bound "to recognise and respect in all future time," these stipulations to the prejudice of Honduras. Being in direct opposition to the spirit and meaning of the Clayton and Bulwer treaty as understood in the United States, the Senate rejected the entire clause, and substituted in its stead a simple recognition of the sovereign right of Honduras to those islands, in the following language:—"The two contracting parties do hereby mutually engage to recognise and respect the islands of Ruatan, Bonaco, Utila, Barbaretta, Helena, and Morat, situated in the Bay of Honduras, and off the coast of the republic of Honduras, as under the sovereignty and as part of the said republic of Honduras."

Great Britain rejected this amendment, assigning as the only reason that the ratification of the convention of the 27th of August 1856, between her and Honduras had not been "exchanged, owing to the hesitation of that Government." Had this been done, it is stated that Her Majesty's government would have had little difficulty in agreeing to the modification proposed by the Senate which then would have had "in effect, the same signification as the original wording." Whether this would have been the effect—whether the mere circumstance of the exchange of the ratification of the British convention with Honduras prior in point of time to the ratification of our treaty with Great Britain would, "in effect," have had "the same signification as the original wording," and thus have nullified the amendment of the Senate, may well be doubted. It is, perhaps fortunate that the question has never arisen.

The British government immediately after rejecting the treaty as amended, proposed to enter into a new treaty with the United States similar in all respects to the treaty which they have just refused to ratify, if the United States would consent to add to the Senate's clear and unqualified recognition of the sovereignty of Honduras over the Bay Islands the following conditional stipulation: "Whenever and as soon as the republic of Honduras shall have concluded and ratified a treaty with Great Britain, by which Great Britain shall have ceded, and the republic of Honduras shall have accepted, the said islands, subject to the provisions and conditions contained in such treaty."

This proposition was, of course, rejected. After the Senate had refused to recognize the British convention with Honduras of the 27th of August, 1856, with full knowledge of its contents, it was impossible for me necessarily ignorant of "the provisions and conditions" which might be contained in a future convention between the British and the United States, mutually desirous, as they are and must ever, may be, of maintaining the most friendly relations with each other, have unfortunately concluded a treaty which they understand in senses directly opposite, the wisest course is to abrogate such a treaty by mutual consent and to commence anew. Had this been done promptly all difficulties in Central America would most probably ere this have been adjusted to the satisfaction of both parties. The time spent in discussing the meaning of the Clayton and Bulwer treaty would have been devoted to this praiseworthy purpose, and the task would have been the more easily accomplished, because the interest of the two countries in Central America is identical, being confined to securing safe transits over all the routes across the Isthmus.

Whilst entertaining these sentiments, I shall, nevertheless, not refuse to contribute to any reasonable adjustment of the Central American questions which is not practically inconsistent with the American interpretation of the treaty. Overtures for this purpose have been recently made by the British government in a friendly spirit, which I cordially reciprocate, but whether this renewed effort will result in success I am not yet prepared to express an opinion. A brief period will determine.

RELATIONS WITH TURKEY AND RUSSIA.

With France our ancient relations of friendship still continue to exist. The French government have several important instances which need not be enumerated, evinced a spirit of good will and kindness towards our country which I hereby reciprocate. Notwithstanding, it is to be regretted that two nations whose productions are of such a character as to invite the most extensive interchanges and freest commercial intercourse, should continue to enforce ancient and obsolete restrictions of trade against each other. Our commercial treaty with France is in this respect an exception from our treaties with all other commercial nations. It jealously excludes discriminating duties both on tonnage and on articles, the growth, produce or manufacture of the country, when arriving in vessels belonging to the other.

More than forty years ago, on the 30 of March, 1815, Congress passed an act offering to all nations, to adopt the same laws with their ships and cargoes, as should be imposed by any nation on our ships from the ports to which our vessels might be confined. It was in my judgment a liberal and just offer, and it has since been followed by many nations. It is a reproach upon us that France alone has not been induced to accept it. Its adoption would place the navigation of the two countries on the footing of perfect equality, and would prevent the exercise of any discriminating duties which might be imposed by the one to the injury of the other. I recommend a law to

WHIG AND COURIER.

temporary triumph of either of the political
in Kansas.

uild the constitution without slavery be
ed by the votes of the majority, the rights
property in slaves now in the territory are so
. The number of these is very small; but
were greater, the provision would be equally
and reasonable. These slaves were brought
the territory under the Constitution of the
d States, and are now the property of those
rs. This point has at length been finally
ed by the highest judicial tribunal of the
try—and this upon the plain principle that
a confederacy of sovereign States acquires a
territory at their joint expense, both equitable
justice demand that the citizens of each and
them shall have the right to take their
erty in it recognized as property by the common
constitution. To have summarily confiscated
property in slaves already in the Territory,
have been an act of gross injustice, and
ary to the practice of the older States of the
which have abolished slavery.

THE REBELLION IN UTAH.

territorial government was established for
by act of Congress approved the 9th of Sep-
r, 1850, and the constitution and laws of the
d States were thereby extended over it, "so
as the same, or any provisions thereof, may
pplicable." This act provided for the ap-
ment by the President, by and with the ad-
and consent of the Senate, of a Governor,
was to be ex-officio Superintendent of Indian
s, a Secretary, three Judges of the Supreme
t, a Marshal, and a District Attorney. Sub-
ent acts provided for the appointment of the
s necessary to extend our land and our law
system over the territory. Brigham Young
appointed the first Governor, on the 20th Sep-
ber, 1850, and has held the office ever since.
st Governor Young has been both Governor
Superintendent of Indian Affairs throughout
period, he has been at the same time the
of the church called the Latter Day Saints,
professes to govern its members and dispose
their property by direct inspiration and author-
from the Almighty. His power has been,
fore, absolute over Church and State.
e people of Utah, almost exclusively belong
his church, and believing, with a fanatical
t, that he is Governor of the territory by di-
appointment, they obey his commands as if
were direct revelations from Heaven. If,
efore, he chooses to that his government shall
in full division with the Government of the
d States, the members of the Mormon
ch will yield implicit obedience to his will.
fortunately existing facts leave but little doubt
such is his determination. Without entering
a minute history of occurrences, it is suffi-
t to say that all the officers of the United
s, judicial and executive, with the single ex-
on of two Indian Agents, have found it
ary, for their own personal safety, to with-
from the Territory, and there no longer re-
any government in Utah but the despotism
Brigham Young. This being the condition of
s in the Territory, I could not mistake the
t of duty. As chief executive magistrate, I
ound to restore the supremacy of the consti-
on and laws within its limits. In order to
this purpose, I appointed a new Governor
other federal officers for Utah, and sent with
a military force for their protection, and to
a posse comitatus in case of need, in the
tion of the laws.

the religious opinions of the Mormons, as long
remained mere opinions, however deplorable in
ves, and revolting to the moral and religious
ents of Christendom, had no right to interfere
s alone, when in violation of the constitution
ws of the United States, become the legitimate
s for the jurisdiction of the civil magistrate.
structions to Governor Cumming have therefore
amed in strict accordance with these principles.
date a hope was indulged that no necessity
exist for employing the military in removing and
ing the tyranny of Brigham Young; but this hope
s vain since Governor Young has by proclamation
clared his determination to maintain his power,
, and has already committed acts of hostility
the United States. Unless he should retrace
s, the territory of Utah will be in a state of open
. He has committed three acts of open hostility
withstanding Major Van Vleit, an officer of the
ent to Utah by the commanding General, to pur-
his duties as a civil officer, has given the
assurance of the peaceful intentions of the gov-
, and that the troops would only be employed
ar emergies when called on by the civil authori-
in the execution of the laws.

s reason to believe that Governor Young has
intended this result. He knows that the con-
of his despotic power depends upon the exclu-
all settlers from the Territory except those who
ognize and his divine mission, and implicitly
his will, and that an enlightened public opinion
Utah soon prostrate institutions at war with the
of God and man. He has therefore for seve-
years been steadily laboring to undermine, both
ously employed in collecting authentic evi-
and testimonies of war, and in disciplining the
s for military services. As Superintendent of
affairs, he has had an opportunity of tampering
the Indian tribes, and exciting their hatred and feeling
the United States. This, according to our in-
, he has accomplished in regard to some of
es, while others have remained true to their
ty. Our intercourse with the Indians has been
ofitable. He has laid in a store of provisions for
ale, which, in case of necessity, as he informed
Brigham Young, "he will conceal, and then take to
ains, and bid defiance to all the powers of the
ment."

at part of all this may be idle boasting; but yet
government will, slightly estimate the efficiency
may be implied by such phrases as fanaticism as
ong as the Mormons in Utah. Yet in the first
in which have existed in our Territories; and authorities
themselves, it was should put it down in
ment that it shall be the last. The pride with
ch the government of the United States
ot to go there with such an imposing force as to
these deluded people that resistance would be
ed, thus spare the effusion of blood. We can in
ment be confident that we have the hearts
of our enemies. In order to accomplish this object,
be necessary, according to the estimate of the
ent, to raise four additional regiments
ed military force recommended to Congress. At the
moment of the return of the troops of the
I am sorry to be obliged to recommend such a
; but I feel confident of the support of Con-
for what it may, in suppressing the insurrection
restoring and maintaining the supremacy of the
tution and laws of the Territory of Utah.

h a naval power so much stronger than
s as to enable it to blockade the ports at
nd of these routes. After all, therefore,
ely rely upon a military road through
territories; and ever since the origin of
vernment, Congress has been in the habit

of appropriating money from the public treasury for the construction of such roads.

The difficulties and the expense of constructing a military railroad to connect our Atlantic and Pacific States have been greatly exaggerated. The distance on the Arizona route near the 32d parallel of north latitude, between the western boundary of Texas on the Rio Grande and the eastern boundary of California on the Colorado, from the best explorations now within our knowledge, does not exceed four hundred and seventy miles, and the face of the country is, in the main, favorable. For obvious reasons the government ought not, to undertake the work itself by means of its own agents. This ought to be committed to other agencies, which Congress might assist either by grants of land or money, or by both, upon such terms and conditions as they may deem most beneficial for the country. Provision might then be made not only for the safe, rapid and economical transportation of troops and munitions of war, but also of the public mails. The commercial interest of the whole country, both east and west, would be greatly promoted by such a road.

The report of the Secretary of Treasury will furnish a detailed statement of the condition of the public finances and the respective branches of the public service devolved upon that department of the government. By this report it appears that the amount of revenue received from all sources into the treasury during the fiscal year ending the 30th June, 1857, was sixty-eight million six hundred and thirty-one thousand five hundred and thirteen dollars and sixty-seven cents. ($68,631,513 67,) which amount, with the balance of nineteen million nine hundred and one thousand three hundred and twenty-five dollars and forty-five cents, ($19,901,325 45,) remaining in the treasury at the commencement of the year, made an aggregate for the service of the year of eighty-eight million five hundred and thirty-two thousand eight hundred and thirty-nine dollars and twelve cents, ($88,532,839 12.)

THE PUBLIC FINANCES.

The public expenditures for the fiscal year ending 30th June, 1857, amounted to seventy million eight hundred and twenty-two thousand seven hundred and twenty-four dollars and eighty-five cents, ($70,822,724 85,) of which five million nine hundred and forty-three thousand eight hundred and ninety-six dollars and ninety one cents, ($5,943,896 91,) were applied to the redemption of the public debt, including interest and premium, leaving in the treasury at the commencement of the present fiscal year on the 1st of July, 1857, seventeen million seven hundred and ten thousand one hundred and fourteen dollars and twenty-seven cents. ($17,710,114 27.)

The receipts into the treasury for the first quarter of the present fiscal year, commencing 1st July, 1857, were twenty millions nine hundred and twenty-nine thousand eight hundred and nineteen dollars and eighty-one cents, ($20,929,819 81,) and the estimated receipts of the remaining three quarters to the 30th June, 1858, are thirty-six million seven hundred and fifty thousand dollars ($36,750,000,) making, with the balance before stated, an aggregate of seventy-five million five hundred and eighty-nine thousand nine hundred and thirty-four dollars and eighty cents ($75,589,934 08), for the service of the present fiscal year.

The actual expenditures during the first quarter of the present fiscal year were twenty-three million seven hundred and fourteen thousand five hundred and twenty-eight dollars and thirty-seven cents, ($23,714,528 37,) of which three million eight hundred and ninety-five thousand two hundred and thirty-two dollars and thirty-nine cents ($3,895,232 39) were applied to the redemption of the public debt, including interest and premium. The probable expenditures of the remaining three quarters, to 30th June, 1858, are fifty one millions two hundred and forty-eight thousand five hundred and thirty dollars and four cents ($51,248,530 04,) including interest on the public debt, making an aggregate of seventy-four million nine hundred and sixty-three thousand fifty-eight dollars and forty-one cents ($74,963,058 41), leaving an estimated balance in the treasury at the close of the present fiscal year of four hundred and twenty-six thousand eight hundred and seventy-five dollars and sixty-seven cents, ($426,875 67.)

The amount of the public debt, as the commencement of the present fiscal year, was twenty-one million sixty thousand three hundred and eighty-six dollars and ninety cents. ($21,060,386 90.)

The amount redeemed since the 1st of July was three million eight hundred and ninety-five thousand two hundred and thirty-two dollars and thirty-nine cents ($3,895,232 39)—leaving a balance unredeemed at this time of twenty-five millions one hundred and sixty-five thousand one hundred and fifty-four dollars and ninety-one cents. ($25,155,154 51.)

The amount of estimated expenditures for the remaining three quarters of the present fiscal year will, in all probability, be increased from the causes set forth in the report of the Secretary. His suggestion, therefore, that authority should be given to supply any temporary deficiency in the treasury by a limited amount of treasury notes, I approve, and I accordingly recommend the passage of such a law.

As stated in the report of the Secretary, the tariff of March 3, 1857, has been in operation for so short a period, of time, and under circumstances so unfavorable to a just development of its results as a revenue measure, that I should regard it as inexpedient, at least for the present, to undertake its revision.

THE WAR AND NAVY DEPARTMENTS.

I transmit herewith the reports issued to me by the Secretaries of War and of the Navy, of the Interior, and of the Postmaster General. They all contain valuable and important information and suggestions which I commend to the favorable consideration of Congress.

I have already recommended the raising of four additional regiments, and the report of the Secretary of War presents strong reasons proving this increase of the army, under existing circumstances, to be indispensable.

I would call special attention of Congress to the recommendation of the Secretary of the Navy in favor of the construction of ten small war steamers of light draught. For some years the government has been obliged on many occasions to hire such steamers from individuals to supply its pressing wants. At the present moment we have no armed vessel in the navy which can penetrate the rivers of China. We have but a few which can enter any of the harbors south of Norfolk, although many millions of foreign and domestic commerce annually pass in and out of these harbors. Some of our most valuable interests and most valuable points are thus left exposed. This class of vessels of light draught, great speed and heavy guns would be formidable in coast defense. The cost of their construction will not be great, and they require but a comparatively small expenditure to keep them in commission. In time of peace they will prove as effective as much larger vessels, and often more useful. Some of them should be at every station where we maintain a squadron, and three or four should be constantly employed on our Atlantic and Pacific coasts. Economy, utility and efficiency combine to recommend them as almost indispensable. Ten of these small vessels would be of incalculable advantage to the naval service, and the whole cost of their construction would not exceed two million three hundred thousand dollars, or $200,000 each.

THE PUBLIC LANDS.

The report of the Secretary of the Interior is worthy of grave consideration. It treats of the numerous important and diversified branches of domestic administration entrusted to him by law. Among these the most prominent are the public lands and our relations with the Indians.

Our system for the disposal of the public lands originating with the fathers of the republic, has been improved as experience pointed the way, and gradually adapted to the growth and settlement of our Western States and Territories. It has worked well in practice. Already thirteen States and seven Territories, have been carved out of these lands, and still more than a thousand million of acres remain in solution. What a boundless prospect this presents to our country of future prosperity and power!

We have heretofore disposed of 303,832,404 acres of the public land.

While the public lands as a source of revenue are of great importance, their importance is far greater as furnishing homes for a hardy and independent race of honest and industrious citizens who desire to subdue and cultivate the soil. They ought to be administered mainly with a view of promoting this wise and benevolent policy. In appropriating them for any other purpose, we ought to use even greater economy than if they had been converted into money and the proceeds were already in the public treasury. To squander away the great and noblest inheritance which any people have ever enjoyed upon objects of doubtful constitutionality or expediency, would be to violate one of the most important trusts ever committed to any people. Whilst I do not deny to Congress the power, when acting bona fide as proprietor, to give away portions of them for the purpose of increasing the value of the remainder, yet, considering the great temptation to abuse this power, we cannot be too cautious in its exercise.

Actual settlers under existing laws are protected against other purchasers at the public sales, in their right of pre-emption, to the extent of a quarter section, or 160 acres of land. The remainder may then be disposed of at public or entered at private sale in limited quantities.

Speculation has of late years prevailed to a great extent in the public lands. The consequence has been that large portions of them have become the property of individuals and companies, and thus the price is greatly enhanced to those who desire to purchase for actual settlement. In order to limit the area of speculation as much as possible, the extinction of the Indian title and the extension of the public surveys ought only to keep pace with the tide of emigration.

If Congress should hereafter grant alternate sections to States or companies, as they have done heretofore, I recommend that the intermediate sections retained by the government should be subject to pre-emption by actual settlers.

It ought ever to be our cardinal policy to reserve the public lands as much as may be for actual settlers, and this at moderate prices. We shall thus not only best promote the prosperity of the new States and Territories and the power of the Union, but shall secure homes for our posterity for many generations.

THE INDIANS.

The extension of our limits has brought within our jurisdiction many additional tribes of Indians, a large proportion of which are wild, untractable and difficult to control.

Predatory and warlike in their disposition and habits, it is impossible altogether to restrain them from committing aggressions on each other, as well as upon our frontier citizens, and these aggravating to our distant States and Territories, define expensive military expeditions are frequently necessary to overawe and chastise the more lawless and hostile.

The present system of making them valuable presents to influence them to remain at peace has proved ineffectual. It is believed to be the better policy to colonize them in suitable localities, where they can receive the rudiments of education and be gradually induced to adopt habits of industry. So far as the experiment has been tried it has worked well in practice, and it will doubtless prove to be less expensive than the present system.

POST OFFICE DEPARTMENT.

The Post Office Department has depended upon appropriations by Congress for several years past, for an important portion of the means of sustaining and extending its operations. Their rapid growth and expansion are shown by a decennial statement of the number of post offices, and the length of post roads, commencing with the year 1827. In that year there were 7,000 post offices; in 1837, 11,177; in 1847, 15,146; and in 1857 they number 28,000. In this year 1783 post offices are supplied by contract, 704 discontinued, leaving a net increase of 1021. The postmasters of 963 offices are appointed by the President.

The length of post roads in 1827 was 106,336 miles; in 1837, 141,243 miles; in 1847, 163,836 miles; and in the year 1857 there are 242,601 miles; and in the year 1857 there are 232,601 miles of post road, including 22,250 miles of railroad, on which the mails are transported.

The expenditures of the department for the fiscal year ending on the 30th June, 1857, as adjusted by the Auditor amounted to $11,507,890. To defray these expenditures there was to the credit of the department on the 1st July, 1856, the sum $763,929; the gross revenue of the year, including the annual allowances for the transportation of free mail matter, produced $8,333,931; and the remainder was supplied by the appropriation from the treasury $2,409,030, granted by the act of Congress approved August 18, 1856, and by the appropriation of $666,000 made by the act of March 3, 1857, leaving $335,030 to be carried to the credit of the department, in the accounts of the current year.

I recommend to your consideration the report of the department in relation to the establishment of the overland mail route from the Mississippi river to San Francisco, California. The route was selected with my full concurrence as the one in my judgement, best calculated to attain the important objects contemplated by Congress.

ECONOMY RECOMMENDED IN PUBLIC EXPENDITURES.

The late disastrous monetary revulsion may have one good effect, should it cause both the government and the people to return to the practice of wise and judicious economy both in public and private expenditures.

An overflowing treasury has led to habits of prodigality and extravagance in our legislation. It has induced Congress to make large appropriations to objects for which they never would have provided had it been necessary to raise the amount of revenue required to meet them by increased taxation or by loans. We are now compelled to pause in our career, and to scrutinize our expenditures with the utmost rigid scrutiny. In performing this duty, I pledge my co-operation to the extent of my constitutional competency.

It ought to be observed, that the same time, that true public economy does not consist in withholding the means necessary to accomplish important national objects entrusted to us by the Constitution, and especially such as may be necessary for the common defense. In the present crisis of the country it is our duty to confine our appropriations to objects of this character, unless in cases where justice to individuals may demand a different course. In all cases care ought to be taken that the money granted by Congress shall be faithfully and economically applied.

NO MONK BILLS TO BE APPROVED WITHOUT READING.

Under the federal constitution every bill which shall have passed the House of Representatives and the Senate shall, before it becomes a law, be approved and signed by the President; and if not approved, he shall return it with his objections to that house in which it originated. In order to perform this high and responsible duty, sufficient time must be allowed the President to read and examine every bill presented to him for approval. Unless this be afforded, the constitution becomes a dead letter in this particular; and even worse, it becomes a means of deception. Our constituents, seeing the President's name and signature attached to each act of Congress, are induced to believe that he has actually performed this duty, when, in truth, nothing is, in many cases, more unfounded.

From the practice of Congress, such an examination of each bill as the constitution requires, has been rendered impossible. The most important business of each session is generally crowded into its last hours, and the alternative presented to the President is either to violate the constitutional duty which he owes to the people and approve bills which, for want of time, it is impossible he should have examined, or, by his refusal to do this, subject the country and individuals to great loss and inconvenience.

To illustrate, a practice has grown up of late years to legislate in appropriation bills at the last hours of the session on new and important subjects. This practice constrains the President either to suffer measures to become laws which he does not approve or to incur the risk of stopping the wheels of government by vetoing an "appropriation bill." Formerly, such bills were confined to specific appropriations for carrying into effect existing laws and the well established policy of the country, and little time was then required by the President for their examination.

For my own part, I have deliberately determined that I shall approve no bill which I have not examined, and it will be a rare case of extreme and most urgent necessity which shall ever induce me to depart from this rule. I therefore respectfully, but earnestly recommend that the two houses would allow the President at least two days previous to the adjournment of each session within which no new bill shall be presented to him for approval. Under the existing joint rule one day is allowed, but this rule has been hitherto so constantly suspended in practice that important bills continue to be presented to him up till the very last moments of the session.

In a large majority of cases no great public inconvenience can arise from the want of time to examine their provisions, because the constitution has declared that if a bill be presented to the President within the last ten days of the session, he is not required to return it, either with his approval or with a veto, in which case it shall not be a law. It may then be, as it ought to be, taken up and passed at the next session. Great inconvenience would only be experienced in regard to appropriation bills; but fortunately, under the late excellent law allowing a salary, instead of a per diem to members of Congress, the expense and inconvenience of a called session will be slightly reduced.

I cannot conclude without commending the [illegible] to your favorable consideration the [illegible] of this District. Without a representative on the floor of Congress, they have, for this very reason, peculiar claims upon our just regard. As this I know, from my long acquaintance with them, they are eminently entitled.

JAMES BUCHANAN.

WASHINGTON, Dec 8, 1857.

A High-handed, Partisan Act by the President.

The summary removal of District Attorney McKeon, for his opposition to the re-election of the notorious Mayor Wood, takes all decent people, even of the democratic party, by surprise. It stamps this administration as a partisan one in the most obnoxious sense, and destroys all that prestige of dignity, and apparent elevation of character with which Mr. Buchanan has hitherto imposed upon the country. As an ordinary maxim of party, adhesion to regular nominations was a defensable one, and one which even our Presidents may properly take into consideration in determining their appointments to office. But there are certainly some decent limits to the extent to which it should be carried—and in our judgment, President Buchanan has overleaped those limits, by acceding to the clamors of Mayor Wood and the subterranean democracy of New York, for vengeance upon the decent men who opposed them.

The infamous character of Wood, and the more infamous character of the great body of his supporters, and of the means by which he obtained a "regular nomination," were such that he had no claim whatever to the benefit of a party usage which can properly be applied only to candidates of respectable character and standing. The respectable democrats of New York refused to support Wood on this ground; but President Buchanan at once declares that *the infamous character of a democratic candidate is no excuse for refusing to support him.* He says "regular nominations must be sustained AT ALL HAZARDS." Thus we have the Chief Magistrate of this great Republic descending into the very lowest arena of party politics, and exhibiting himself as a partisan of the most reckless type—and he closes his announcement of the adherence of his party, and upholds its claims to the most implicit obedience, under penalty of instant decapitation. Every office holder under him must sacrifice not only his self-respect, but all regard for the good reputation and welfare of the community in which he resides, and support, the most infamous candidates that may be prescribed by a party caucus—or he will himself be sacrificed by the autocrat at Washington.

By the act which he has just performed, President Buchanan adopts the sentiment of John Cochrane, who said that "if Wood were proclaimed a devil incarnate," if he was nominated by intelligent democrats he must be supported,—and he ratifies the declaration of Wood himself, made in private conversation with the editor of the Courier & Enquirer a year or two ago, that "if he (Wood) were to go home that night and cut the throats of his wife and children, his party would still support him—he knew his party!" And it now appears he did know it, so far as President Buchanan represents it.

Statements and Rumors from Washington

The correspondent of the Journal of Commerce wrote as follows, on the 3d:

"Judge Douglas had an interview with the President this morning. Judge Douglas stated his views with frankness and decision, though in a conciliatory manner. The President was firm and unshaken in his own position, and begged Douglas to withhold his opinion until he should see the Message, and the documents presented with it. That the Judge declared that he had not withheld his opinion, and that he considered the whole action of the Convention as illegitimate, and of no binding force.

The President is determined to uphold the Convention, and is in favor of the acceptance by Congress of the Constitution, which they framed, whether the Kansas people vote on it or not.

Mr. Douglas declares that he would oppose the Convention even if it came, accepted by 2000 votes in Kansas—for that would but represent a minority.

A despatch to the *N. Y. Post* says:

Rumor says that the Cabinet demands of the President a support of the Lecompton Constitution, and that the President will comply. In that event, Governor Walker will return to the City and issue an address to the people of the United States, developing the future policy of Walker, Douglas, Forney & Co. Mr. Forney is hence closeted with Douglas.

Glenny Jones resorted in Democratic circles, that Wendell's money carried Pennsylvania for Buchanan.

The following is from the correspondent of the Commercial, under date of 8th:

The administration is losing friends without conciliating opponents. They have alienated the Pierce men, and are in danger of losing the support of the Douglas, Walker, and Forney men. They are jealously regarded by the Free-eaters, who are really to quarrel on any point. Worse, than all, they are out of money.

The first thing that Mr. Buchanan is to do will probably serve to repel from his support the Northern Democratic conservatives, and the next is to go to Congress and ask for means to carry on the government in times of peace.

When Mr. Douglas arrived at Washington, he was received with an ovation. Cannon were fired, houses were illuminated and bands of music gave forth their welcoming notes.

The Philadelphia Press (Forney's paper) says:

The delegation from Ohio is declared to be a unit against the Calhoun contrivance. The delegation from Illinois is known to be as one man with Judge Douglas. Several leading democratic members from Pennsylvania have already taken bold ground in opposition to the Calhoun Convention.

The Secretary of the Treasury has power to issue Treasury notes. Thus the government is soon to be borrowing.

Several explorers for gold in the Lake Superior mining regions, have recently returned to Ontonagon, Michigan, and although they refuse to give any definite information, it is conjectured from their excellent spirits and their preparations for another trip in the spring, that they have been successful. This is enough to start off a host of "prospectors" in search of a new El Dorado.

The commercial powers of Europe are said to be about [illegible] measures to check the [illegible] of Austria.

LOCAL AND MAINE NEWS.

Penobscot County Officers.

The County Commissioners have counted and declared the votes for Register of Deeds and Treasurer as follows:

VOTE FOR REGISTER OF DEEDS.	
John Goodell, Jr.	5,752
John Goodell	140
John J. Goodale	64
Israel B. Norcross	4,152
Israel Norcross	89
S. B. Norcross	1
Alfred Herrick	87
Joseph H. Perkins, Jr.	1
Jefferson Chamberlain	1
Ambrose C. Flint	1
Total	10,318

VOTE FOR TREASURER.	
Ambrose C. Flint	6,018
Matthew H. French	4,186
David Brown	127
A. Herrick	1
M. S. French	1
Total	10,333

The steamer Sanford arrived at her wharf in this city yesterday, (Wednesday) at 12 o'clock—the river being then nearly clear of ice. The boat will run ten days or a fortnight longer, either from this city or from Frankfort.

We are indebted to Bryant's Express—also to Mr. O. R. Patch—for Boston papers in advance of the mail.

KNAP'S PATENT ROCK OIL LAMPS, offered for sale by Mr. Edwin S. Ferrar as agent, is, we understand, a different article from those which have been heretofore offered,—and the oil is a rectified article of a purer kind. The lamps sold by Mr. Ferrar have been tried here by various persons, and found to give a brilliant light, without smoking it is stated, and at a very moderate cost. The anecdote from a Detroit paper was published without our knowing that any new lamp had been invented. We first saw Mr. Ferrar's advertisement the next morning, and have since been assured that there is no danger of being Ethiopianized by the use of his lamps and oil.

THE BURGLARS NOT ALL CAUGHT.—Notwithstanding the arrest of several house thieves by the police on Saturday, noticed in our paper of Monday, we learn of several attempts on Sunday evening to enter houses and stores. The occupant of a dwelling on Kenduskeag Avenue found a ladder erected over a piazza in his yard early in the evening, between 9 and 10 o'clock. The evening was quite dark and the ladder was discovered accidentally; taken down and looked up. It was supposed that the ladder was placed there early, so that any noise made then, might not give such alarm as a noise at a later hour would; and that the intention was to come in the quiet of the night and enter the chamber window.—The removal of the ladder probably satisfied the rogue or rogues of the detention of their plan, and no further attempt was made. It should be a matter of precaution to secure all chamber windows.

DROWNED.—In Frankfort, on the 9th inst, two boys named James McCormick and William McDermott, aged nine years, while engaged in play, fell from the Steamboat wharf and were drowned. The bodies had not been recovered Wednesday afternoon. They were children of Daniel McCormick and David McDermott.

CHANGE IN THE MAIL DOWN EAST. The Machias Union says the Lubec mail, by a recent change, now leaves East Machias at six A. M., and returning, leaves Lubec at twelve M. This enables the contractor to connect with the main route between Calais and Bangor in season for letters to continue along, instead of laying over at East Machias for twenty-four hours.

The Lewiston Falls Journal hopes the mills in that place will soon again be in full operation and continue to stand as they deservedly do, at the head of Mills in New England. The Journal adds in reference to the discharging of hands from the Mills, that it is not a fact that the best help leave under such circumstances as the present "hard times." The proportion of those who do leave is but a fair average—most of them preferring to take a reasonable view of the matter, and hope for better times.

A trunk was stolen from the stage between East Machias and Whiting recently, and afterwards found near Red Beach, fifty miles off.

Several boys, between the ages of thirteen and seventeen years, were arrested for store breaking, at Eastport, last week.

Thomaston and Castine are the small wealthy places of their population in Maine, says the Belfast Republican.

The Kennebec river was frozen over as far down as Richmond, on Sunday night last.

The winter term of the Maine Seminary, at Lewiston, opened on the 24th, the number of students in attendance being 75. One-half of the new boarding hall was opened for the reception of students on Monday, and not far from fifty are quartered there. The whole building will be completed by spring. It will accommodate 120 students. Board from $1,50 to $1,75 per week, exclusive of tea and coffee; 25 cts. is added if these are included.

LUMBER BUSINESS AT THE EASTWARD.—Machias Union says:

"The mills have all suspended." They have done an extra season's work in the quantity of lumber cut, and stock with some of them was getting short.

The season throughout was unusually favorable for manufacturing lumber, and on the whole our lumber dealers have as little cause to complain as any class of men in the community.

Some air is now being made, about getting teams to the woods. Not a large amount of lumbering will be done, probably, not half of what five or six years ago turned up, but at present, it is difficult to estimate, from different causes how much will be done.

"Dame Rumor" will have it, that several persons, between Machias and Cherryfield, have lost money which they sent by mail, within a month or two past. The aggregate is placed as high as $600, and they think it has been abstracted from the mails.—*Machias Packet.*

TELEGRAPHIC

TO THE DAILY WHIG AND COURIER

CONGRESSIONAL.

WASHINGTON, Dec. 9.

SENATE. In the Senate Mr. Pugh gave notice of a bill for the improvement of the navigation of the Ohio.

A resolution was passed inviting the clergymen of the District to officiate gratuitously as chaplains of the Senate.

Mr. Gwin gave notice of his intention to introduce bills for the construction of a Northern, Southern, and Central Pacific Railroad, also a bill to organize the Territory of Arizona.

Mr. Douglas said that yesterday he was under the impression that the President had approved the action of the Lecompton Convention, and while under that impression he felt it his duty to state that while he concurred in the general views of the message, yet so far as it did approve or endorse the action of that Convention he entirely dissented from it, and he would await, himself of an opportunity to give his reasons for such dissent. Upon more careful and critical examination of the message he was rejoiced to find that the President had not entirely approved of the action of that Convention. He was also rejoiced to find that the President had not recommended that Congress should pass laws receiving Kansas into the Union as a State under the Constitution framed at Lecompton. True, the tone of the message indicates the willingness of the President to sign any bill that Congress might pass for receiving Kansas as a State under that Constitution, but it was a very significant fact that the President had refrained from any endorsement of the Constitution, and any recommendation as to the course which Congress should pursue in regard to the admission of Kansas. Indeed, the President had expressed deep mortification and disappointment that the whole Constitution was not submitted to the people of Kansas for their acceptance or rejection. He proceeded to show that Congress could not properly receive Kansas into the Union under the Lecompton Constitution. Not only the slavery question, but all others must be submitted to the people of Kansas, as they are guaranteed to establish all their domestic institutions for themselves. On this principle the whole Constitution must be submitted to ascertain whether it meets with their approbation.

Mr. Douglas contended that the people of Kansas ought to have an opportunity to vote against the Constitution, if it chose to do so. He compared the proposed mode of voting on the Lecompton Constitution to the freedom of election in Paris when Louis Napoleon was chosen. The reason assigned why the people should not be allowed to vote on its acceptance was that if they had a chance they would vote it down by an overwhelming majority. He believed it was a clear violation of the organic act to force an obnoxious Constitution upon them.

When Mr. Douglas concluded, there was applause from the galleries.

Mr. Mason moved they be cleared, remarking that the decorum of the Senate had been frequently violated in this way.

Mr. Hunter hoped not.

Mr. Clay thought the applause commenced on the floor, and it would be hard to punish spectators for following that example.

Mr. Bigler hoped the motion would be withdrawn.

Mr. Mason acquiesced, but hoped that the next time the chance was repeated it would not be allowed to pass with impunity.

Mr. Bigler of Penn, replied to Mr. Douglas, saying that the convention was called according to law, and had been recognized by the President and Governor of the Territory. It was then right to submit the constitution to the people, or send it to Congress without such submission. If it was right in itself, republican in form, and the people had tacitly decided the slavery question, it would not be his wish to keep them out of the Union simply because the whole constitution had not been submitted to them. To do so would be inconsistent with the doctrine of non-intervention. There was nothing in the past history of the country to justify such a course. It would be the duty of Congress to look at the question as it came before them and to do the best they could, looking at the happiness of the entire country. He had long been under the impression that it would be best for the Union and Kansas, that the State should be admitted at the first allowable opportunity. In order to localize the strife he would have preferred that the whole constitution had been submitted to the people, but persons outside of the Territory have no right to interfere with the slavery question there. He believed that the people of Kansas now have an opportunity to decide whether to have a free or slave State. He could not throw over determining its entire course until they should make such decision.

He said the position of Mr. Douglas to day was in utter derogation of that which he occupied when he voted for Mr. Toombs' bill which proposed to make a State Constitution and put it into operation without submitting it to the vote of the people and this only a short time ago. He could not understand how Mr. Douglas had so readily become sensitive regarding the rights of the people, after having attempted such an infringement upon them.

Mr. Mason replied to what he characterized as a fallacy in the remarks of Mr. Douglas, who explained and said he had been misrepresented. Mr. Bigler remarked, that in a conversation with Col. Hundertson, who was an active member of the convention, he understood him to say there were two constitutions virtually. Mr. Douglas—"If there are two, I should like to see the other." Mr. Bigler—"I say precisely a minor." Mr. Douglas—"If precisely alike, what difference does it make if you may vote for one or the other?" Mr. Bigler—"one is for free and the other for slave state, that is the difference." Mr. Douglas—"It makes no difference now many copies they make—the simple question is that they only allow the people to vote on slavery, nothing else." The senator from Pennsylvania had assumed an air which I thought unnecessary, and rather intimated to me that he spoke by authority.

Mr. Bigler—I expressed my own views deliberately formed, and they are in concurrence with those of the President. I know of no authority. I am certain he did not speak for the President. I know that for the President has just spoken for himself in his message, in which he condemns the Convention, for not submitting the constitution to the people, and refused to recommend it to receive it. The President is a bold, frank man, and if he intended to give us an administration measure he would say so. It is not respectful to assume that he will do what he will not recommend us to do. Of course I know the Senator from Pennsylvania did not speak by authority.

Mr. Bigler—I think I am safe in saying, and think the Senator from Illinois will agree, that the President upholds, in his message, the doctrine that the convention had the right to form a constitution, and submit it to the people for approval, or send it to Congress for approval. I think this deducible from the message, that the President does not hold that because the entire constitution was not submitted to the people, Kansas should be kept out of the Union.

Mr. Douglas, I infer from the Message that the President does hold that the convention had a right to form the constitution and send it here; but that was only the right to petition for redress of grievances under the federal constitution, and not because the legislature had power to constitute that a legal convention.

Mr. Bigler. Where did you get that?

Mr. Douglas replied. A gentleman—meaning Mr. Trumbull—yesterday read from a speech made by Mr. Buchanan twenty years ago to show that the legislature had no right to create a convention to supersede the territorial government, and to usurp it would be gross usurpation. The Democratic party has held that doctrine ever since, and, asserted it years ago, by endorsing his (Douglas) report from the committee on territories. Three hundred thousand copies were circulated as a party document, and he himself paid for 100,000 of them. Laughter.

Mr. Bigler entered his protest, and claimed the statute of limitation. He could not consent that Mr. Douglas should hold the President responsible for principles laid down twenty years ago, under entirely different circumstances. It's not half so long since Mr. Douglas declared the Missouri line as the best compromise. In 1848 he proposed to extend it to the Pacific ocean! Yet he repealed the whole of it.

Mr. Douglas denied the right of Mr. Bigler to offer the statute of limitations. None but the authorized attorney of the party can thus interpose. As the senator has tacked any authority to speak for the President, he cannot file the plea. Mr. Douglas approved the statute of limitations. He needed one very much himself. He had never boasted that he had never changed his opinions. He felt every year a little wiser than the year before. Had the President ever withdrawn that opinion? He denied the right to plead the statute of limitations against the Cincinnati convention until the Charleston convention met. He stood now where he stood last year, because he believed he was right. It was true he voted for Mr. Toombs' bill, and he was ready to vote for it again, if by doing so there would be no quarrel. It would not do to taunt him with once voting for a measure he would not vote for now.

Mr. Bigler said he had not taunted the senator, who had complained that great wrong had been done by not submitting the entire constitution to the people, while he had voted to put a State constitution into operation without submitting any part of it to the people.

Mr. Douglas, replied that his explanation was the language of the President in his instructions to Governor Walker, taking it for granted that the constitution would be submitted to the people. Mr. Toombs' bill being silent on that subject, he took it for granted that the constitution would be submitted. If the President was right in taking that ground why was not Douglas right?

Mr. Bigler did not intend to hold the senator from Illinois to anything which did not appear on the journal. At a private meeting, before Mr. Toombs' bill was introduced, it was held in view of the difficulties surrounding the question, that it would be better that no provision submitting the constitution to the people should be inserted in the bill, and it was his understanding that the convention then proposed would make a constitution and send it to Congress without submitting it to the people.

Mr. D. in reply said he had not, like the Senator, to insinuate what he would not openly declare—if Mr. (Douglas) present at the meeting referred to and sanctioned such doctrine let him (Bigler) say so.

Mr B. said if he was constantly at fault it was painful indeed. Perhaps he had wrongly spoken

STEAMERS.

WINTER ARRANGEMENT.

NEW YORK & PORTLAND.

The Splendid and Fast Steamer

Chesapeake,

Capt. SYDNEY CROWELL, will run regularly between *New York* and *Portland*, as follows:

Leaves Brown's Wharf, Portland, every SATURDAY, at 4 P. M., and returning leaves New York, Pier 12 N. R., every TUESDAY, at the same hour.

This vessel has just been fitted up with fine accommodations for Passengers, making this the most speedy, safe and comfortable route for travellers between New York and Maine.

PASSAGE $6,50—including Fare and State Rooms.

☞ *Goods forwarded by this line to and from* Montreal Quebec, Bangor, Bath, Augusta, Eastport and St. John. Also, connects with steamers for Halifax. Goods taken through with despatch, at the cheapest rates.

For freight or passage apply to

H. B. CROMWELL, Pier 12 N. River, New York.

EMERY & FOX, Brown's Wharf, Portland.

Portland, Nov. 24, 1857. dm

California Steamers,

Carrying the United States Mail.

5th and 20th of each month.

Through Tickets, including transit of the Isthmus, via. Panama R. R.

By order of the Postmaster General, the United States Mail Steamers will hereafter be despatched from New York direct to Aspinwall, on the 5th and 20th of each month.

Passengers are landed at the Railroad Depot, Aspinwall, and conveyed across to the Pacific Steamers *without any extra expense*. This is the only line giving entire Through Tickets, including meals, on the Isthmus.

Transit made in *four hours, entirely by daylight*, thus avoiding the great exposure by night in open boats to fever and ague, and 200 miles of dangerous lake and river navigation over rocks and shoals.

Arrangements have now been completed so that the regular U. S. Pacific Mail Steamer will leave Panama for San Francisco immediately on arrival of the Atlantic Mails and passengers, thus securing passengers by the Mail Line *sure* and *short* passage without any detention on the Isthmus.

☞ *No Tickets must be signed by any of the Company's Agents before they will be recognized by the Agent at Panama*, and tickets thus signed can be obtained of the *only authorized Agent* for the Atlantic and Pacific Mail Steamship Companies, GEO. CHAS. BARRETT, Agent, No. 16 Broad Street, Boston.

August 1, 1857 *ly*

Portland to Boston.

Summer Arrangement.

The Steamers LEWISTON, Capt. Geo. Kalch, and the FOREST CITY, Capt. F. A. Price will run as follows:

Leave Atlantic Wharf, Portland, every Monday, Tuesday, Wednesday, Thursday, and Friday, at 7 o'clock P. M., and Central Wharf, Boston, every Monday, Tuesday, Wednesday, Thursday, and Friday, at 8 o'clock P. M.

Fare in Cabin, $1,25
Fare on Deck, 1,00
Freight taken as usual.

Each Boat is furnished with a large number of State Rooms, for the accommodation of ladies and families, and travelers are reminded that by taking this Line much saving of time and expense will be made, and that the convenience of arriving in Boston at late hours of the night will also be avoided.

The Boats arrive so soon for the passengers to take the earliest trains out of the city.

The Company are not responsible for baggage to any amount exceeding $50 in value, and that personal, unless notice is given, and paid for at the rate of one passenger for every $500 additional value.

L. BILLINGS, Agent.

June 12, 1857 tf

Steamboat Notice.

The Penobscot River Steamboats have commenced running between *Oldtown* and *Fire-Islands*, leaving Oldtown daily at 7 o'clock A. M. for Fire Islands, and 2 o'clock P. M. for Plantagenet. Leave Five Islands at 3 o'clock A. M. for Oldtown, arriving in season for passengers to take the 2 o'clock train of cars for Bangor.

Carriages will go in addition to convey passengers to and from Mattawamkeag.

D. W. MOOR, Agent.

Oldtown, April 27, 1857

500 Agents Wanted.

A Homestead for $10.

THIRD DIVISION.

$310.000 WORTH OF FARMS & Building Lots in the Gold Region of Culpepper County, Va., to be divided among 10,000 subscribers, on the 7th of December, 1857. Subscriptions only *ten dollars* down, or fifteen dollars down and pay the rest on the delivery of the deeds. Every subscriber will get a building Lot or a Farm, ranging in value from $150 to $25,000. These FARMS and LOTS are sold so cheap to induce settlements, a sufficient number being reserved, the increase in the value of which will compensate for the apparent low price now asked. Upwards of 1000 Lots are already sold, and a company of settlers, called the *Rappahannock Pioneer Association*, is now forming, and will soon commence a settlement. Ample security will be given for the faithful performance of contracts and promises.

☞ Nearly 15,000 acres of land, in different parts of Virginia, now at command, and will be sold to settlers at from $1 up to $800 per acre. *Unquestionable titles will in all cases be given.* 10,000 CUTTERS, COOPERS, PLANERS, &c., are wanted; and

☞ 500 Agents to obtain subscribers, to whom the most liberal inducements will be given. Some Agents write that they are making $200 per month. For full particulars, subscription prices, &c., apply to

DR. SANFORD'S INVIGORATOR, or Liver Remedy.

THIS IS ONE OF THE GREATEST SCIENTIFIC Medical discoveries ever made, and is really astonishing in its effects. It cures as by a charm, *during fevers, and seldom failed to cure any kind of ague. Jaundice or Dyspepsia*, of which are the result of the principal regulators of the functions in this organ, if not all, are fully developed. The remedy, from the healthy proper performance of its functions, is at once the whole system and man—the Liver—having the disease of that organ cured by this study, in a few years, to find some remedy for many derangements which effect health. It is at last found, and perfected. Compound in any of its forms, has but to be taken, and conviction is certain.

A compound of rare herbs and extracting their active virtues of the medicinal herbs, or best matter in their place, a healthy stomach, cleansing the blood, giving tone and energy, removing the offending, radical cure, greeable effects to by the system, the constant use of two teaspoonfuls of the medicine.

It will wind will follow, recovery is assured. *Sick Headache*, the use of two teaspoonfuls at a time.

The Invigorator succeeds for the bad effects arising from all those attacks give it really a trial. *Dandruff*, difficult to cure, yet it has never failed to cure the worst case.

For *Dyspepsia* or *Jaundice*, it is a perfect cure. It relieves and yet never fails in this.

For *Nervous Complaints*, it is warranted a sure remedy.

For *Female Complaints*, it is a perfect cure, as it removes the cause, and a few doses cause a cure. It is freely taken, while others doctor.

It must be known that it is not to be cured by a derangement of Liver medicine. The Invigorator is such a powerful, never before discovered, cure of the Liver, that it has no equal. The active medicine is made use of which such as who see their effects, for without producing benefit. It acts as a cathartic, but it is not to be taken for the purpose of the bowels. It is to take some water and take some water and in this way the medicine will scarcely be tasted.

THRICE WEEKLY

Kennebec Journal for 1858.

During the approaching session of the Legislature the undersigned will continue the publication of the THRICE-WEEKLY JOURNAL, being the XIVth Volume of the same.

As is well known, the chief purpose of this paper is to afford the public of Maine a faithful account of the deliberations and actions of its Legislature. With the reports of the Legislative doings we intend also to publish the proceedings of Congress, as they are given in the best reports from Washington.

We look with confidence to our Republican friends throughout the State to aid us in obtaining subscribers. Especially do we solicit from each Republican member of the Legislature that *personal effort* in his locality without which a remunerating list cannot be secured.

The Thrice-Weekly Journal will be published on *Monday, Wednesday* and *Friday* mornings.—The price will be

Single Copy, One Dollar for the Session.

As usual, payable in advance. Any person forwarding us $5 shall be entitled to the tenth copy extra. For $16 we will send ten copies and one extra; for $24 thirty copies extra.

☞ It is desirable that the names of subscribers accompanied with the money, may be forwarded at or before the commencement of the session.—*Money remitted by mail at our risk.*

EDWARD STEVENS & SAYWARD.

Augusta, Nov. 10, 1857.

Thrice-Weekly Age, for 1857.

We propose to issue the last volume of the Thrice-Weekly Age during the session of the coming Legislature.

To enable us to do this without a very *great pecuniary loss* it is absolutely necessary that our friends throughout the State, for whose gratification and benefit the publication is made, should aid in giving us a good list of subscribers.

The comparatively small number of Democratic members of the Legislature renders this service in our behalf doubly requisite this year, and we therefore confidently rely upon receiving it.

The character of the Thrice-Weekly Age is so well known that we deem it needless to add anything more.

The terms will be $1 in advance, for the session. Postmasters, or others, who will forward us the names of ten subscribers and the $10, shall receive a copy in addition.

It is very desirable that the lists should be forwarded as early as the first of January.

ELIAS G. HERGE & CO.

Nov. 11, 1857.

SUBSCRIPTIONS to all Social Publications rec'd by

O. R. PATTEN.

THE HATCH HOUSE,

Main Street, Bangor, Maine.

This House has been thoroughly repaired, refitted, and refurnished throughout with New Carpets, Furniture, Beds and Bedding, and is now open for the reception of company, under the charge of the subscriber.

It is a large, commodious, and well furnished House, situated on Main Street, near the centre of the city, and within a short distance of the Steamboat Wharves and the Depot of the P. & K. Railroad, to and from which Coaches are always in readiness to convey passengers.

Its numerous advantages to strangers, and particularly to those visiting the city on business or for pleasure, renders it one of the most desirable Houses in the city.

Connected with the House is a large and commodious Stable, in charge of competent and faithful hostlers.

By strict personal attention to the comfort of his guests, the proprietor hopes to receive a liberal share of patronage.

NATHAN PERRY, Jr.

Bangor, Feb. 26, 1856

OLDTOWN HOUSE,

Oldtown, - - - - - Maine.

BY MRS. HARRIET STINSON.

The undersigned very respectfully informs her friends and the public generally, that she has lately refitted and refurnished the *Oldtown House*, and is prepared to accommodate all who may favor her with a call. Every attention will be bestowed upon guests and travelers, who are assured that for a brief or long stay, they will find their wants and comforts always cared for. The table will always be supplied with the best the market affords, and all the luxuries of the season.

In connection with the above House is a large and well finished hall, suitable for Dancing parties.

Connected with the House is one of the largest Stables in Oldtown, with the best accommodations for horses and teams, which is under the care of a faithful hostler.

Parties from Bangor, or other places, can be accommodated on reasonable terms, on giving a short notice.

HARRIET STINSON.

Oldtown, July 4, 1857. tf

STANLEY HOUSE,

WATER STREET, AUGUSTA, ME.

G. W. RICKER, would respectfully announce to the Traveling Public that he has reopened the Stanley House, Augusta, and furnished it throughout with NEW and ELEGANT FURNITURE, and made every arrangement necessary to continuing it as a First Class Hotel.

This is the most centrally located House in the city, being directly opposite the Depot, and in close proximity to the steamboat landing, Court House, Post Office, and but a few minutes' walk from the State House.

Business men, or persons traveling for pleasure, will find that this House affords every convenience or luxury that can be desired, and the Proprietor is determined to spare no pains to make it in every respect second to none in the State.

Books for all Stages leaving town will be kept at this House.

In connection with the above are good Stables with attentive and careful Hostlers.

The Mountain House,

CAMDEN,

Has been refitted and opened for the accommodation of the Traveling Public and Boarders.

TERMS, $1.00 PER DAY.

The subscriber also offers the said stand and Furniture for sale. E. W. PENDLETON.

Camden, July 17, 1857

AMERICAN HOUSE,

BOSTON.

Recestablishment of the old plan of management.

LEWIS RICE, Proprietor, respectfully announces that he has resumed the *old plan* of management, as it existed before the recent alteration. Trial of the European system in *Old Hotels*, proves, that although the advantages are great, yet the plan is better adapted for the *smaller class* of hotels.

The accommodations and conveniences of the House are unsurpassed, and the recent improvements and alterations, for the comfort of guests, leave nothing to be desired.

Boston, Sept. 16, 1857 3m

DR. SANFORD'S

INVIGORATOR, OR LIVER REMEDY!

HAS ALL THE GOOD QUALITIES OF A Purgative Medicine, answering the purposes of any cathartic without the debilitating effects experienced from most purgatives. It acts slowly and gently, but surely, moving the bowels to carry off all the secreted matter, at the same time stimulating the *Liver* to a proper performance of its functions.

(The Proprietor loves a joke sometimes. Take one of two teaspoonfuls at a time for a week, and it will soon disappear. For an over-heated stomach, or when food rises in the throat, take the Invigorator after eating, and it will improve. Bilious cases of a more fatal character, such as Liver Complaint, Dyspepsia, Jaundice, Bilious Attacks, Dysentery, Fever, Women, and all Female Obstructions, for which it has no equal.

We know the old nothing now before the American public, prepared with such skill by scientific men, particularly in relation to the Liver, as Dr. Sanford's Invigorator for Liver Remedy. It has attained a reputation second to no other article in the world, simply because it rests on its own merits. To convince all by trial that it is what the proprietors claim it to be, that any of our friends who are suffering from any such diseases as are described in Dr. Sanford's advertisement, we knowledge no remedy at all so surely cure them as the Invigorator.

There has lately been brought to our notice a medicine that seems to possess wonderful curative and healing properties in Diseases of the Liver, Stomach and Digestive organs. It commences with, many testimonials in its favor that we have heard its effects in some of the worst cases of continual debility, caused by deranged liver, and in every instance the effect was to relieve or give a permanent cure. Dr. Sanford's Liver Invigorator is what we refer to. We always have been credulous about cured by patent medicines, but we are convinced that this medicine, for family use, is not overrated by the host of recommendations it has. Our advice is, for all troubled with Indigestion, Debility or Bowel Complaint, to get a bottle and try it, for we feel it relief will be experienced.

Blessings to the invalids who can Dr. Sanford's invigorator, for it will relieve them of their pains as soon as it is taken into their stomach. Pain and misery cannot exist where the Invigorator is used. Let it will surely cure them away as the light will banish darkness, of this there can be no doubt to those who try it. And carries conviction with every dose taken. Another evidence is the thousands of certificates from those who use it, or have been cured by it. Try one bottle—if it does not benefit, then we are mistaken.

GODEY'S LADY'S BOOK, Putnam's, Graham's, Arthur's, and Sartain's, at

A. BARTLETT'S.

Premium awarded to T. C. BUTLER, Derby Line, Vt., on MILLER'S CONDITION POWDERS, for Horses & Colts, at the Vermont State Fair, held at Burlington, Vt., Sept. 9, 10, 11 and 12, 1856.

MILLER'S CONDITION POWDERS For Horses & Colts.

PRICE—Twenty-five Cents.

THE changes of weather, and season, with the changes of use and feed, have a very great effect upon the blood and sinuous fluids of Horses. At these changes they require an assistant to nature to throw off any disorder of the fluids of the body that may have been imbibed, and which, if not attended to, will result in the Yellow Water, Heaves, Bots, &c., all of which will be prevented by giving one pint two of these Powders, Spring or Fall, and will at any time, cure where any symptoms of disease appear, if used in time. They purify the blood, remove all inflammation and fever, loosen the skin, clean the water, and invigorate the whole body, enabling the animal to do more work with the same feed.

The action of these powders is directly upon the secretive glands, and therefore all diseases arising from or producing a bad state of the blood are speedily cured by them. Also, colds and surfeit of any kind are cured by one or two of these powders, if given according to directions.

In all cases of Horse Distemper, they should be given at the first symptom to prevent fevers, and in the last stage, to carry off all humors of the blood, and to restore a healthy action to the glands of the throat.

We, the subscribers, hereby certify that we have used *Miller's Condition Powders*, for Horses and Colts, prepared by *T. C. Butler*, Druggist, Derby Line, Vt., and think them the best Powders for Horses and Colts that there out of condition, that we have ever used. We would recommend them to Farmers, Stage Companies, Statesmen, and others, dealing in or keeping Horses and Colts.

They will clean the Worms and Bots out of a Horse's stomach, and give him a good appetite for his food, and a good coat.

They are also good for the Heaves, and for Cough, and they have been highly recommended for the cure of Worms and Bots in Colts.

They clean the water, loosen the skin, and invigorate the whole body, enabling the horse to do more work with the same feed. (signed by)

Timothy Winn—Mr. Butler would say that Mr. Wing is the proprietor of the Canada House and Stage office on Stonestead Plain, and was for many years proprietor of the Derby Line House, Derby Line, Vt., where he raised the black colt, called the Know Nothing, which was sold at $1350 at four years old.

Erastus Lee—Mr. Lee is one of the most extensive farmers in Eastern Canada, and has raised some very valuable horses, which he has sold at high prices. This gentleman raised and sold the bay horse called Charley, which was afterwards sold for $1000 and taken to France. He also raised and sold the horse called Billy, which has been taken to California, and is held at $5,000. Mr. Lee keeps from 40 to 50 horses and colts, and makes great use of Miller's Condition Powders.

Wm. B. Hoyt—Keeper of the Lyndon House and Livery Stable at Lyndon, Vt.

H. Heath—driver from Lyndon to St. Johnsbury.

A. D. Flint—St. Johnsbury, Vt., dealer in horses.

HONEY.

THE LUXURY AND PROFIT OF HONEY MAKING

☞ **Torrey's Bee Hive.**

THE subscriber, having purchased the right of making and selling *Davis' Patent Bee Hive* for the Counties of Penobscot, Lincoln and Sagadahoc, which has been received with so much favor, and taken the first premiums wherever exhibited, has introduced an improvement into the Bee Hive and is now prepared to make the same in accordance, with the Davis' Platform, and to sell rights to town and individuals.

This Bee Hive, thus improved, is admitted by persons acquainted with the honey-making business to be superior to every thing yet invented for the purpose. It covers all the requisitions for the profitable management of the apiary, by providing for ventilation at all seasons of the year, room, for the exercise and feed of the bees, convenience for the removal of excrement, for the proper separation of the swarms, and generally for the health and comfort of the workers.

The boxes used in this Hive for storing honey are the best adapted, in their size, for the market, holding from three to six pounds each.

The subscriber wishes to purchase one hundred swarms of bees in exchange for bee hives and individual rights.

☞ Persons, fitty swarms of Bees, with the new hives.

For hives, individual rights, &c., address

E. B. TORREY,
Exchange-street, Bangor.

DR. PETTIT'S

CANKER BALSAM!

To be Widely Heard and to be Known.

It is its own BEST RECOMMENDATION

Not a short time since we were talking with an agent who had formerly sold the Balm, but had now sold all out. He informed me that it had cured his

WIFE'S SORE BREAST

After which others had tried it, and

EVERYBODY LIKED IT.

A Carpenter in Camden, Maine, afflicted with

CANKER IN THE MOUTH,

tried various remedies, had recourse to physicians, but obtained no relief.

His mouth was one complete CANKER SORE. The cure was slow and effected TO THE POINT OF SUPPURATION, and CLEAVING OFF FROM THE TEETH.

A perfect cure was effected by ONE BOTTLE of

Dr. Petitt's Canker Balsam.

C. W. ATWELL, Deering Block, North side Market Sqr., Gen. Agent for Maine.

Sold by all the Bangor Druggists, and dealers in medicine everywhere. y21 cowstawd&w

TREMONT MILLS.

Teas, Coffees, Chocolates, Cocoas, Spices, &c.

WHOLESALE—AND ALSO IN SMALL PACKAGES

E. E. DYER & CO.

(Sign of the Chinaman grinding Coffee,)

No. 8 Broad, near State Street,.....Boston.

Supply the best, finest and purest articles, at the *lowest Cash prices*. Their Stock consists of

Teas, Coffees, Chocolates, All spices, Pepper, Mustard, Ginger, Cayenne Pepper, Nutmegs, Cinnamon, Cloves, Cream Tartar, Tartaric acid, Prepared Dandelion Root, &c.

Having every facility for manufacturing and preparing the several articles named, the public may rely on having them *pure* and *genuine*, as they are put up carefully, and bear our name and label, "TREMONT MILLS, E. E. DYER & CO." To give consumers some idea of our sales, we annex the following scale of prices, viz:

lb. Hiching Tea,	1,75	lb. Mocha Coffee,	1,10
lb. Oolong Tea,	2,00	lb. Java Coffee,	1,00
lb. Y. Hyson Tea,	2,50	lb. Good Coffee,	1,00

☞ The Spices are put up in ¼ and ½ lb. tin cases, expressly for family use, and are warranted to be strictly a pure article, a trial only need to establish them in public favor.

SPANISH COFFEE.—We would call the attention of consumers and dealers to our *Spanish Coffee*, as an article which is highly esteemed, and gives the greatest satisfaction. It is prepared with particular care, and by a peculiar process in roasting, one pound of this coffee, it is believed, is equal to 1½ lbs. of any other.

DANDELION COFFEE.—This article is carefully prepared at our mills, and put up in packages having our trade mark, and may be relied upon as the best and most approved mixture of dandelion and coffee.

TARAXACUM, or *Prepared Dandelion Root*. This article is prepared and roasted at our Mills, is retailed by Family Grocers generally in city and country, and bearing our trade mark, "*Chinaman grinding coffee*," may be relied upon as the *genuine article*. The proportion used is about one half the quantity of coffee. The price is 20 cents per pound, and it is warranted to be the same as that which has been sold for fifty cents a pound by druggists.

The medical properties of Dandelion are well known, and held in high estimation by all who use it. This being a preparation of the root, with all its medicinal virtues retained, can be mixed with coffee or not, as best suits the taste, and will be found cheap and economical as a family beverage, one pound of which being nearly equal to two pounds of coffee. It is prescribed by many eminent physicians, to invalids, children and aged persons, as a nutritious beverage, and as a remedy for Dyspepsia, Bilious affections, &c.

☞ Be careful to observe that all our Taraxacum has our trade mark—"Chinaman Grinding Coffee"—as there are many imitations of our article called Taraxacum in the market.

☞ *To Grocers and Dealers* a liberal discount is made, enabling them to supply their customers at the same low rates.

TO CASH PURCHASERS.—Our object being to secure large sales at small profits, we offer inducements which cannot be afforded by those who do business on the credit systems and we confidently invite an examination of the quality of our stock, and our prices, as compared with those of any other house.

Boston, April 23, 1857 3awdawly

Alpine Hair Balm,

—FOR—

Restoring Gray Hair to its Original Color

WARRANTED to cure Baldness, Scurf, Dandruff, Itching, and all diseases of the skin. This Balm gives the scalp a new and healthy action, restores the coloring matter to the roots of the Hair, which passes through the Hair and gives it its natural color without the use of Hair Dye.

Hundreds of preparations have been introduced, pretending to preserve the Hair and keep it from falling off, composed of Oils, Alcohol, and other deleterious materials, and all to no use. Hair dyes have been introduced that do not give the Hair a natural color, besides being troublesome to use. This Balm is not a Dye. Knowing that a preparation was needed to do what was required for the Hair, the proprietor was induced to experiment until he could obtain an article that would be the exact remedy, and after seven years trial has perfected this Balm. It is soothing and emollient, allays all irritation of the scalp, thereby stopping that troublesome itching. It cures Dandruff, and Scurf, and when the hair has turned gray it will bring it back to its original color, be it Black, Brown or Auburn. It makes the Hair soft and glossy, prevents it from falling off and will be soon approving this Balm for only a few days—life will be given to the roots of the Hair, and growth will soon appear. Growth does not take place at the end of the Hair, as will be seen in persons who have had their hair dyed. If you examine gray hair that has been colored for a week, you will find it black at the roots, that the hair has come out gray, hence it is necessary to have the fluid at the roots of the hair healthy, that the whole hair may be a natural color. Each hair has a root in the skin, and is of itself a hollow, gray tube, through which there is a constant circulation of the pigment from the roots. When this pigment or coloring matter, dies out, it leaves the hair hollow, and it becomes gray. To invent a Balm that would produce this pigment has become the study of the proprietor. The discovery of the Alpine Hair Balm will do it. It will bring the hair to its natural color by making anew the coloring matter in the roots of the hair.

It is a mistaken notion that oil or grease will restore the hair, as nothing can be more injurious. The Alpine Hair Balm will restore the skin and save the hair of those who have been sick with fever or any other disease.

Dr. McLANE'S CELEBRATED VERMIFUGE AND LIVER PILLS.

Two of the best Preparations of the Age.

They are not recommended as Universal Cure-alls, but simply for what their name purports.

The VERMIFUGE, for expelling Worms from the human system, has also been administered with the most satisfactory results to various animals subject to Worms.

The LIVER PILLS, for the cure of LIVER COMPLAINT, all BILIOUS DERANGEMENTS, SICK HEADACHE, &c.

Purchasers will please be particular to ask for Dr. C. McLane's Celebrated VERMIFUGE and LIVER PILLS, prepared by

Fleming Bro's

SOLE PROPRIETORS, Pittsburgh, Pa., and take no other, as there are various other preparations now before the public, purporting to be Vermifuge and Liver Pills. All others, in comparison with Dr. McLANE'S, are worthless.

The GENUINE McLane's Vermifuge and Liver Pills can now be had at all respectable Drug Stores.

American & Foreign Patents.

R. H. EDDY,

Solicitor of Patents,

Late Agent of U. S. Patent Office, Washington under Act of 1837,

76 State Street, opposite Kilby-st.,

BOSTON.

AFTER an extensive practice of upwards of twenty years, continued to the United States, also in Great Britain, France, and other foreign countries. Caveats, specifications, Assignments, and all Papers of Inventors for Patents, executed on liberal terms, and with despatch. Research made in American and foreign works, to determine the validity or utility of Patents or Inventions—and legal or other advice rendered in all matters touching the same. Copies of the claims of any Patent furnished by remitting One Dollar. Assignments recorded in Washington.

This Agency is not only the largest in New England, but through it inventors have advantages for securing Patents, by ascertaining the patentability of inventions, not possessed by, if not immeasurably superior to, any which can be offered them elsewhere. The testimonials below given prove that more is MORE SUCCESSFUL AT THE PATENT OFFICE than the subscriber, and as SUCCESS IS THE BEST PROOF OF ADVANTAGES AND ABILITY, he would add that he has abundant reason to believe, and can prove, that at no other office of the kind are the charges for professional services so moderate. The immense practice of the subscriber, during twenty years past, has enabled him to accumulate a vast collection of specifications and official decisions relative to patents. These, besides an extensive library of legal and mechanical works, and full accounts of Patents granted in the United States and Europe, render him able, beyond question, to offer superior facilities for obtaining patents.

All necessity of a journey to Washington, to procure a patent
